I live by this project and have walked by this property many many times. It's current layout does not fit the neighborhood. In part because the soon to be ADU is a converted garage, it is the only lot in the neighborhood that has such a huge front set back.

I know that it is not part of what you are reviewing right now, but the fact a property 5 homes from the train station is required to build a garage is ridiculous. I hope you guys consider giving the applicant the option of turning it into a one car garage and using the other space for something useful if they wanted.
