Official Update on the Fiscal Year 25-26 Street Improvement Project

June 18, 2026

We are pleased to provide an update on the City of South Pasadena's ongoing project to enhance multiple street segments during the 2025-2026 Fiscal Year. This project is a comprehensive effort to improve our neighborhood infrastructure with smoother road surfaces, brand-new water mains, sewer repairs, and the reconstruction of concrete sidewalks, curbs, and gutters. Construction began in September 2025 and is expected to continue through mid-summer of 2026.

Construction Areas

Work is currently scheduled or underway on the following streets:

- **Arroyo Verde Road** (from Marmion Way to Monterey Rd)
- **Glendon Way** (from Lyndon St to Monterey Rd)
- **Mill Road** (from Garfield Ave to End)
- **Milan Avenue** (from Oak St to Edgewood Dr)
- **Edgewood Drive** (from Milan Ave to Wayne Ave)
- **Pine Street** (from Meridian Ave to Ramona Ave)
- **Oneonta Knoll** (from Fremont Ave to Primrose Ave)
- **Maple Street** (from Fremont Ave to Primrose Ave / from Meridian Ave to Huntington Dr)

Project Status & Progress

Since the last update on June 4th, 2026, the City's contractor, Gentry Brothers, Inc., has been performing concrete and water improvements.

Concrete work restarted on June 8th on Milan Avenue and is nearing completion. The only location that remains incomplete is in front of 1517 Milan Avenue. This location has a large tree root that is preventing the contractor from constructing ADA compliant sidewalk that adheres to width and slope requirements. Staff will communicate with residents prior to a determination for the tree.

Concrete repairs started on Maple Street between Meridian Avenue and Huntington Drive. The contractor will continue working on concrete improvements for the next two to three weeks.

Abandonment of the old water main along Oneonta Knoll was completed on June 16th.

Testing of the completed water main infrastructure on Glendon Way was completed. The Contractor will connect the new water infrastructure with existing infrastructure at the intersection of Monterey Road on June 23rd and connect service laterals on June 24th and 25th.

Installation of water service laterals and hydrant laterals continued on Pine Street and is nearing completion and will be completed on the week of the 23rd.

Over the next two weeks, the following improvements are anticipated:

- Concrete repairs will be completed on Milan Avenue.
- Connecting the new water main to the existing water main on Glendon Way will be completed.
- Connection of water service laterals along Glendale Way will be completed. This work was delayed due to issues with the testing of the newly installed pipes and had to be rescheduled.
- Water service laterals and hydrant laterals along Pine Street will be completed.
- Testing of water mains and service laterals along Pine Street will be completed.
- If the testing of water infrastructure along Pine Street meets City standards the contractor will begin connecting the newly installed water infrastructure to the existing water infrastructure the week of June 29th.
- Paving of Maple Street between Fremont Avenue and Primrose Avenue will be completed the week of June 22nd. Residents have been notified and should expect road closures for the entire week.
- Paving of Oneonta Knoll between Fremont Avenue and Primrose Avenue will be completed the week of June 22nd. Residents have been notified and should expect road closures for the entire week.

Stay Informed

We understand that construction in your neighborhood can be a challenge, and we are committed to keeping you informed. As the project continues, **residents can visit** SouthPasadenaCA.gov/Street-Improvement-Project to view the construction schedule, specific work locations, and any expected service interruptions.

Please check back regularly for the most current information as we move toward completion. Thank you for your continued patience as we work to improve South Pasadena's infrastructure!
