

Orange Grove Avenue/State Route 110 Interchange Improvements

Before
After

Project Description:

This project's three main goals are to:

- 1) Eliminate back-up on the 110 Freeway at the Orange Grove off-ramp;
- 2) Improve traffic safety on southbound Orange Grove Avenue as it approaches the freeway; and
- 3) Improve pedestrian safety along Orange Grove Avenue.

The improvements include the installation of a landscaped median that greatly increases traffic safety. Traffic signals have been installed at the Orange Grove Avenue on- and-off ramps on the north and south sides of the 110 freeway. As a result, congestion has been reduced on both the 110 freeway ramps and Orange Grove Avenue.

Sidewalks along Orange Grove Avenue (from the 110 freeway to Columbia Street) have been improved and vintage street lights have been installed to provide greater pedestrian safety.
